Designing a curriculum for the reduction of stigma associated with mental disorders among medical students

**Name of the Course:**
Designing a curriculum for the reduction of stigma associated with mental disorders among medical students

**Date of Approval:**
1397/8/6

**Institution:**
University of Medical Sciences, Iran

**Author:**
Rasoulian

**Email:**
rasoulian.m@gmail.com

**Student:**
Farahnaz Rezvanifar

**Email:**
farahnaz.rezvanifar@gmail.com

**Abstract:**

The aim of this study was to design a curriculum for the reduction of stigma associated with mental disorders among medical students. The curriculum was developed based on the needs assessment of the students and the feedback from the faculty members. The curriculum was implemented in a randomized controlled trial, and the results showed a significant reduction in stigma among the students who received the intervention compared to the control group.
