**Abstract:**
This study aimed to evaluate the efficacy of hydroalcoholic extract of rose in the treatment of chronic idiopathic constipation in patients attending Mofateh Clinic in Yasuj. A total of 60 patients were randomly divided into two groups: a treatment group (30 patients) and a control group (30 patients). The treatment group received hydroalcoholic extract of rose, while the control group received a placebo. The results showed a significant improvement in constipation symptoms in the treatment group compared to the control group. The study concluded that hydroalcoholic extract of rose can be an effective and safe option for the treatment of chronic idiopathic constipation in patients attending Mofateh Clinic in Yasuj.

**Keywords:**
Hydroalcoholic extract of rose, chronic idiopathic constipation, Mofateh Clinic, Yasuj.
